

CONTROL YOUR SPURGE

You can do something NOW!

Integrated Pest Management Works

PREVENT

- Avoid transporting infested hay and gravel
- Clean equipment of spurge
- Quarantine animals before moving

CONTAIN

- Attack leafy spurge immediately before a small patch becomes a big problem. Don't wait to act
- Apply chemical to perimeters of infestations
- Spot spray small new infestations

CONTROL

- Bio-control (flea beetle, leaf tier moth, hawk moth)
- Sheep and goat grazing
- Chemical
- Mowing and cultivation
